Cultural, Speech and Drama

The Speech & Drama Programme is a theme-based, structured learning that aims to develop children's abilities in language communication and expression. Through the creative use of dramatic skills training and performance, we build up each child's confidence through practice of oral and body language communication skills.

The programme also includes exposure to traditional Chinese folk art and craft to engage children in a creative learning process, includes Chinese Tea Arts, Chinese Calligraphy, Ink Painting, and more. This cultivates interest and appreciation for Chinese culture in children from a young age.
